

## *Caring for you in the acute hospital setting.*

### *Fallon Clinic Hospitalists – Setting the Standard for Expert, Compassionate Care*

Fallon Clinic hospitalists at Saint Vincent Hospital are acute-care physicians who work in the hospital caring for Fallon Clinic patients. During your hospital stay, a hospitalist will partner with your primary care physician to ensure that you receive the highest quality inpatient care with the best possible outcomes.

Each of Fallon Clinic's hospitalists is board-certified, credentialed and experienced at working in a hospital setting and with hospital staff. While you are receiving inpatient care, a hospitalist will work to streamline the delivery of your care, coordinating all medical tests, specialist consultations and other services.

#### **A Team of Dedicated Physicians, Close at Hand**

Fallon Clinic's hospitalists are located at Saint Vincent Hospital 24 hours a day, seven days a week. Their daily presence at the hospital allows them to constantly evaluate your condition and make timely, informed decisions about the course of treatment. In most cases, patients see the same hospitalist for the majority of their hospital stay.

Very importantly, our hospitalists communicate directly with your primary care physician, keeping him or her informed about your health status while you are receiving inpatient care. Upon your discharge from the hospital, a Fallon Clinic hospitalist will consult with your primary care physician regarding follow-up care.

#### **Hear what doctors and patients have said about our HBI specialists:**

- *"I don't know where to begin. It is very difficult to put into words exactly how appreciative I am for all you've done for me. You made me feel so comfortable, you explained everything and you really cared. Thank you is not enough for all you've done. I am so very grateful of you. Thanks so much."*
- *"I am truly indebted for all the help you provide to me and my patients. It would be impossible to work an 8 to 10 hour office day and then expect to see all my in-hospital patients. I feel extremely confident in the professional, efficient and compassionate care you provide to all my in-hospital patients. My patients feel very comfortable with your care."*
- *"My partner and I really appreciate your help and the care you give our patients. THANKS AGAIN!"*

**All patients benefit from seeing the same hospitalist for the majority of their hospital stay.**
